

CURTain

OEM COMPONENT

CURTain

the portable light encasement for
FABian®

SAFETY ENCASEMENT

TECHNOLOGY

CURTain protects FABian® users from aerosols, blood splashes and spills during the automatic process. CURTain can easily be lifted up during or after the operation.

The portable light encasement does not need any current. It is driven by gas pressure springs.

For lifting CURTain up and down a simple pushing mechanism is integrated.

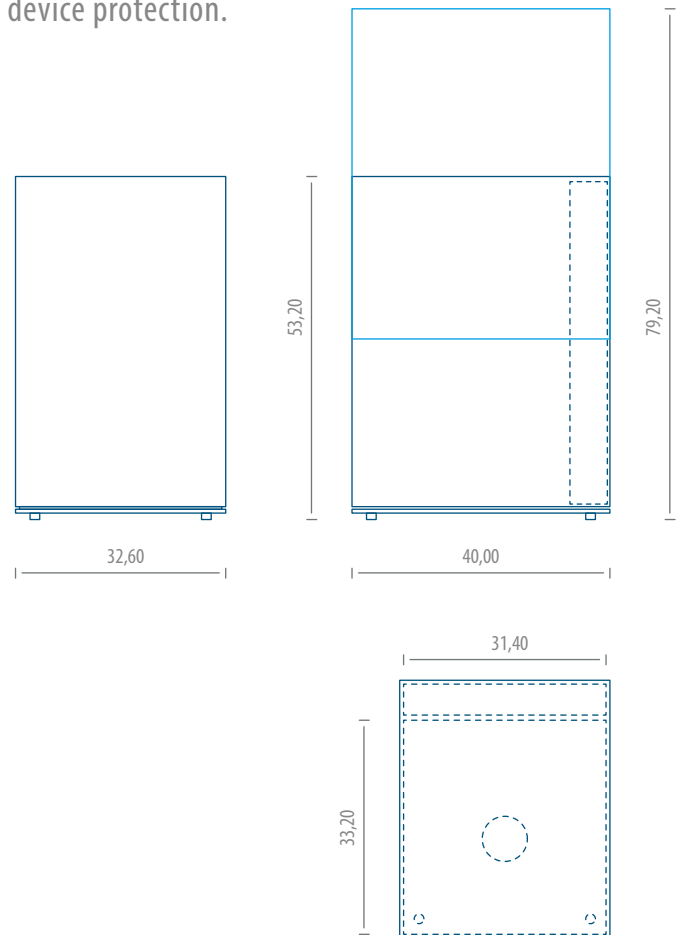

The aluminum rack promises extra stability and device protection.

Material

Transparent acrylic glass encasement based on an aluminum rack.

Advantages

- no current
- easy to use
- portable
- maintenance-free
- easy to clean

TECHNICAL DATA

Height: 52 cm + 26 cm

Weight: 16 kg

Length/Depth: 40 cm

Width: 33 cm
